

Q. Draw LR Parsing Table of following Grammar

$$S \rightarrow AA$$

$$A \rightarrow aA$$

$$A \rightarrow b$$

Solⁿ

The augmented grammar is

$$S' \rightarrow S$$

$$S \rightarrow AA$$

$$A \rightarrow aA$$

$$A \rightarrow b$$

We can obtain canonical collection of sets of LR(0) items as follows:

$$I_0 = \text{closure}(\{S' \rightarrow \cdot S\}) = \{S' \rightarrow \cdot S, S \rightarrow \cdot AA, A \rightarrow \cdot aA, A \rightarrow \cdot b\}$$

$$I_1 = \text{goto}(\{I_0, S\}) = \text{closure}(\{S' \rightarrow S \cdot\}) = \{S' \rightarrow S \cdot\}$$

$$\begin{aligned} I_2 = \text{goto}(\{I_0, A\}) &= \text{closure}(\{S \rightarrow A \cdot A\}) \\ &= \{S \rightarrow A \cdot A, A \rightarrow \cdot aA, A \rightarrow \cdot b\} \end{aligned}$$

$$\begin{aligned} I_3 = \text{goto}(\{I_0, a\}) &= \text{closure}(\{A \rightarrow a \cdot A\}) \\ &= \{A \rightarrow a \cdot A, A \rightarrow \cdot aA, A \rightarrow \cdot b\} \end{aligned}$$

$$I_4 = \text{goto}(\{I_0, b\}) = \text{closure}(\{A \rightarrow b \cdot\}) = \{A \rightarrow b \cdot\}$$

No possible goto from I_1

$$I_5 = \text{goto}(R_{I_2}, a) = \text{closure}(\{S \rightarrow aA \cdot\}) \\ = \{S \rightarrow aA \cdot\}$$

$$I_6 = \text{goto}(I_2, a) = \text{closure}(\{A \rightarrow a \cdot A\}) \\ = A \rightarrow a \cdot A, A \rightarrow \cdot aA, A \rightarrow \cdot b \\ = I_3 \text{ (same as } I_3 \text{)}$$

So,

$$I_4 = \text{goto}(I_2, b) = \text{closure}(\{A \rightarrow b \cdot\}) = \{A \rightarrow b \cdot\} \\ = I_4 \text{ (same as } I_4 \text{)}$$

Again

$$I_6 = \text{goto}(I_3, a) = \text{closure}(\{A \rightarrow aA \cdot\}) \\ = \{A \rightarrow aA \cdot\}$$

$$\text{goto}(I_3, a) = \text{closure}(\{A \rightarrow aA \cdot aA\}) \\ = \{A \rightarrow a \cdot A, A \rightarrow \cdot aA, A \rightarrow \cdot b\} \\ = I_3 \text{ (same as } I_3 \text{)}$$

$$\text{goto}(I_3, b) = \text{closure}(\{A \rightarrow b \cdot\}) \\ = \{A \rightarrow b \cdot\} \text{ same as } I_4$$

Now So, total no. of state is 7

Now

We calculate FOLLOW function as

$$\text{FOLLOW}(S) = \{\$ \}$$

$$\text{FOLLOW}(S) = \{\text{FOLLOW}(S')\} = \{\$ \}$$

$$\text{FOLLOW}(A) = \{\text{FIRST}(A) \cup \text{FOLLOW}(S)\} \\ = \{a, b\}$$

The DFA of above grammar is

Now, we construct SLR Parsing table as

States	Action Table			GOTO Table	
	a	b	\$	S	A
I ₀	Shift I ₃	Shift I ₄		I ₁	I ₂
I ₁			Accept		
I ₂	Shift I ₃	Shift I ₄			I ₅
I ₃	Shift I ₃	Shift I ₄			I ₆
I ₄	Reduce 3	Reduce 3	Reduce 3		
I ₅			Reduce 1		
I ₆	Reduce 2	Reduce 2	Reduce 2
